

UX Designer + Researcher // marisabivi.ca // 613.875.8164 // hello@marisabivi.ca // Ottawa, ON

Summary

User Experience Designer with 7+ years of experience designing intuitive, user-centered solutions for enterprise SaaS and B2B products. Passionate about solving complex workflows, optimizing team processes, and enhancing user engagement through research-driven design. Proven track record of leading cross-functional collaboration to deliver three successful product redesigns and seven scalable design systems, ensuring consistency and efficiency. Adept at balancing user needs with business goals, advocating for human-centered design, and continuously iterating based on data-driven insights.

Work Experience

Senior UX/UI Designer
2023 - 2024

Portage Cybertech

- Worked with high-level stakeholders, including PMs, Research and UX Lead to define the UX vision for 3 products (2 being full redesigns).
- Worked with fellow designers to build and maintain design systems (including a white label friendly design system) for 3 different products.
- Developed comprehensive onboarding documentation to streamline the new hire experience, ensuring a smooth transition and faster ramp-up time for team members.
- Effectively articulated the ideas behind my work and received positive feedback from the leadership and the VP level.
- Planned, recruited, and conducted usability studies on high-fidelity prototypes. Synthesized research insights into directional solution, further refining final implementation.

Product Designer
2022 - 2023

AMCS Group (Formerly FigBytes)

- Focused on 2 upcoming product solutions, while assisting in the production of a scalable design system to support UX and dev teams in the full product redesign.
- Conducted secondary research for upcoming solutions: Water Stewardship and Supplier Transparency (Scope 3).
- Interviewed potential clients to understand their goals and needs in the above problem spaces.
- Contributed to key product screen designs for the refresh.
- Trained internal and external designers on the design system and give feedback on their work.

Product Designer
2019 - 2022

TrueContext (Formerly ProntoForms)

- Designed high fidelity mock-ups for prototypes to align goals and validate ideas with PO, Devs, other Designers and conducted user testing. Then analyzing and compiling results.
- Spearheaded 16 new features and 6 improvements, over 13 have launched.
- Initiated and built the design systems for web solutions and mobile apps (iOS + Android) to expedite the team design process and consistency.
- Planned 18 employee events as part of the Social Committee.
